DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3, 14-16, 29, and 31-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 14, 29, and 36 are indefinite because the claims are unclear. It is not clear to the examiner how the time difference expander (variable delay circuit) functions. How does it determine the first and second changeover points of the first and second signals? How does it expand the time difference between the first and second changeover points? Is there some sort of edge detection device included in the time difference expander (variable delay circuit)? Claims 29 and 36 are also unclear, because the examiner does not understand if applicant is referring to the input clock signal (CLK) as the first clock signal or is applicant referring to the first signal (A) as the first clock signal? It appears from the specification and the drawings that applicant has always referred to first signal (A) as the first clock signal from which the first (and/or second changeover point is determined; see Applicant's arguments filed August 15, 2005, page 12). If first clock signal A is the first clock being referred to in claims 29 and 36, then it is not clear how the first delay circuit receives the first clock signal. It is the

examiner's understanding that the first delay circuit receives the input clock signal (or control clock signal CLK).

Correction or clarification is required.

Claims 2-3, 15-16, and 31-35 are also rejected due to the limitations of the base claims and any intervening claims.

Allowable Subject Matter

3. Due to the indefiniteness of the claims, a determination of allowability has not been made at this time.
